# GEOANZ 2027 CONFERENCE

## ADVANCES IN GEOSYNTHETICS
### Safer, Greener, and Smarter with Geosynthetics – Future Ready Mining
3–5 August 2027, Perth, Australia

Join industry leaders, researchers, and practitioners at **GEOANZ 2027** – a premier event dedicated to the latest innovations, applications, and future directions in geosynthetics.

This conference will showcase cutting-edge knowledge, practical solutions, and emerging technologies shaping safer, more sustainable, and smarter infrastructure and mining practices.

## Call for Abstracts
**Inviting submissions soon**

We welcome contributions across a broad range of topics, including:

- Tailings & mine waste applications
- Coastal and river protection
- Durability and long-term performance
- Embankment basal reinforcement
- Filtration, drainage & erosion control
- Hydraulic and stormwater structures
- Innovative uses & new product development
- Barrier systems
- Railway stabilisation
- Reinforced soil slopes & walls
- Road and pavement stabilisation
- Seismic & natural disaster resilience
- Soil–geosynthetic interaction
- Sustainability & green technology

## Why attend?

The Society aims to bring together professionals from around the world involved in:

- Design, manufacture, testing, and use of geosynthetics
- Research and education in geotextiles and geomembranes
- Infrastructure, environmental, and mining applications

## GEOANZ 2027 offers:

- Valuable technical learning
- Networking with industry experts
- Engagement with exhibitors
- Insightful keynote presentations
- Collaboration opportunities across Australia, New Zealand, and globally

## Stay updated

Conference details will be released soon.
